Some design projects requires a more
geometric touch, so this SS can fill in some
cases those requirements without looking
for other fonts.

agg

Single-storey Stylistic Set ON

Tailed SS can give a pinch of
grotesquesque to the family and also
conect with the Arabic script style that is
more connected.

aalltto

Tailed Stylistic Set ON

Tailed Stylistic Set ON

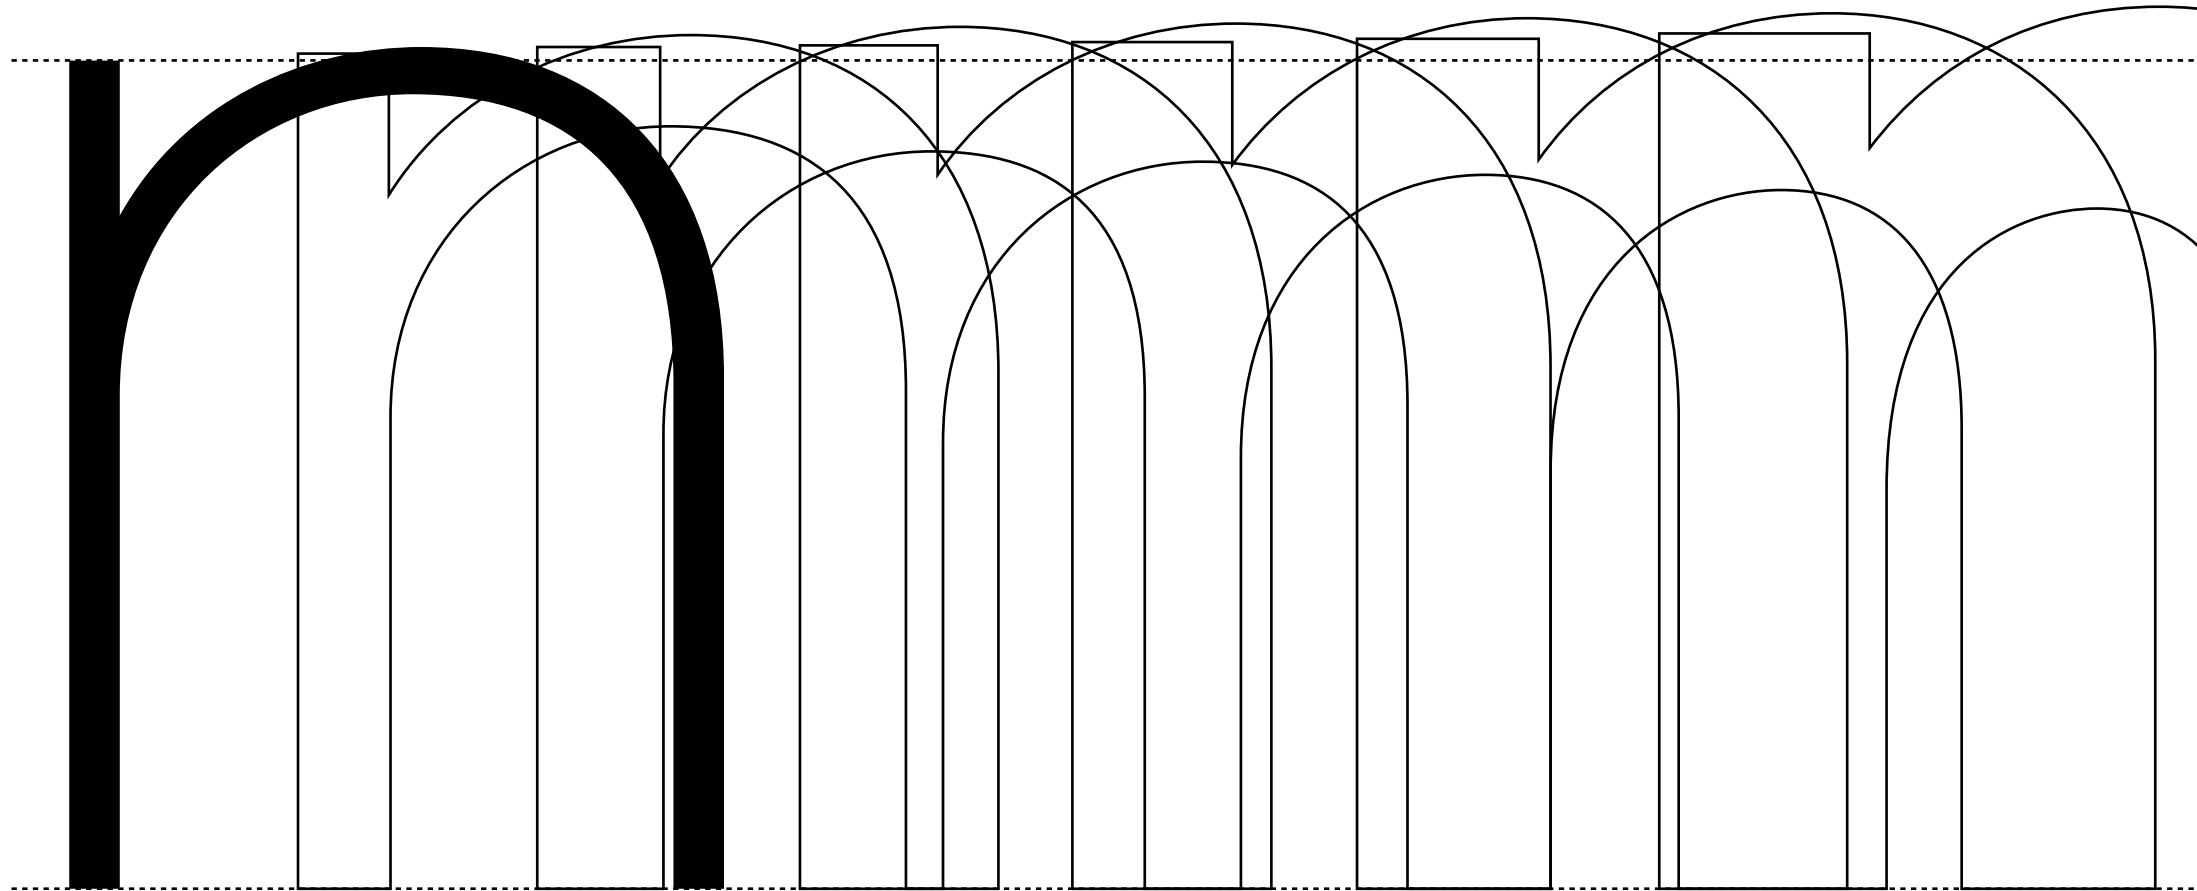

For a more professional finish, this feature allows to align properly some characters to the Cap Height, e.g. at sign, dashes, question and quotation marks and other punctuation signs.

@soft @SOFT

Case-sensitive OFF

Case-sensitive ON

Optimal progressive x-height and
overshoots per weight for optical
compensation when matching styles

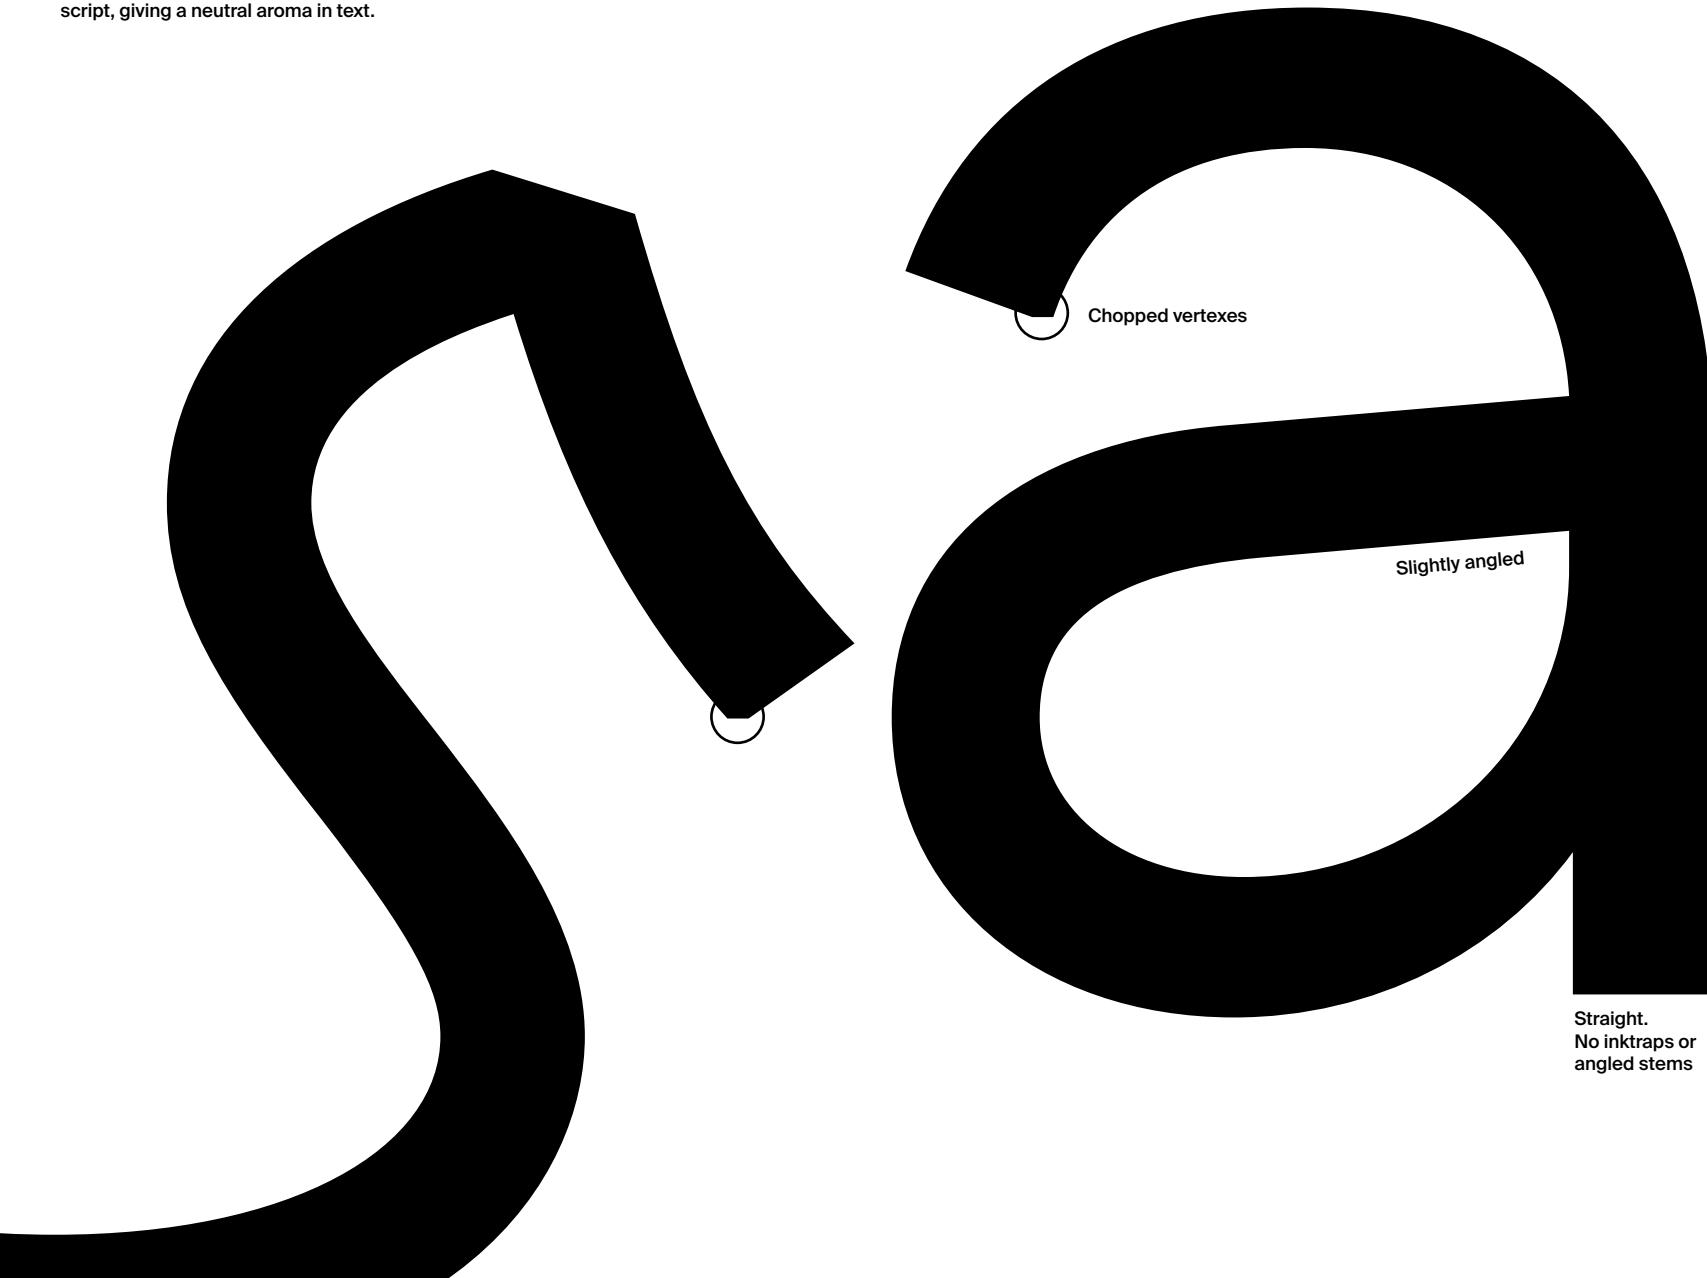

This can bring a contemporary and
distinctive approach to the family.

lasso

This can bring a contemporary and
distinctive approach to the family.

fi fit

In lowercase letters there's a predominant use of round monolinear forms with sweet boucles but strong and straightforward traits matching the texture of the Arabic script, giving a neutral aroma in text.

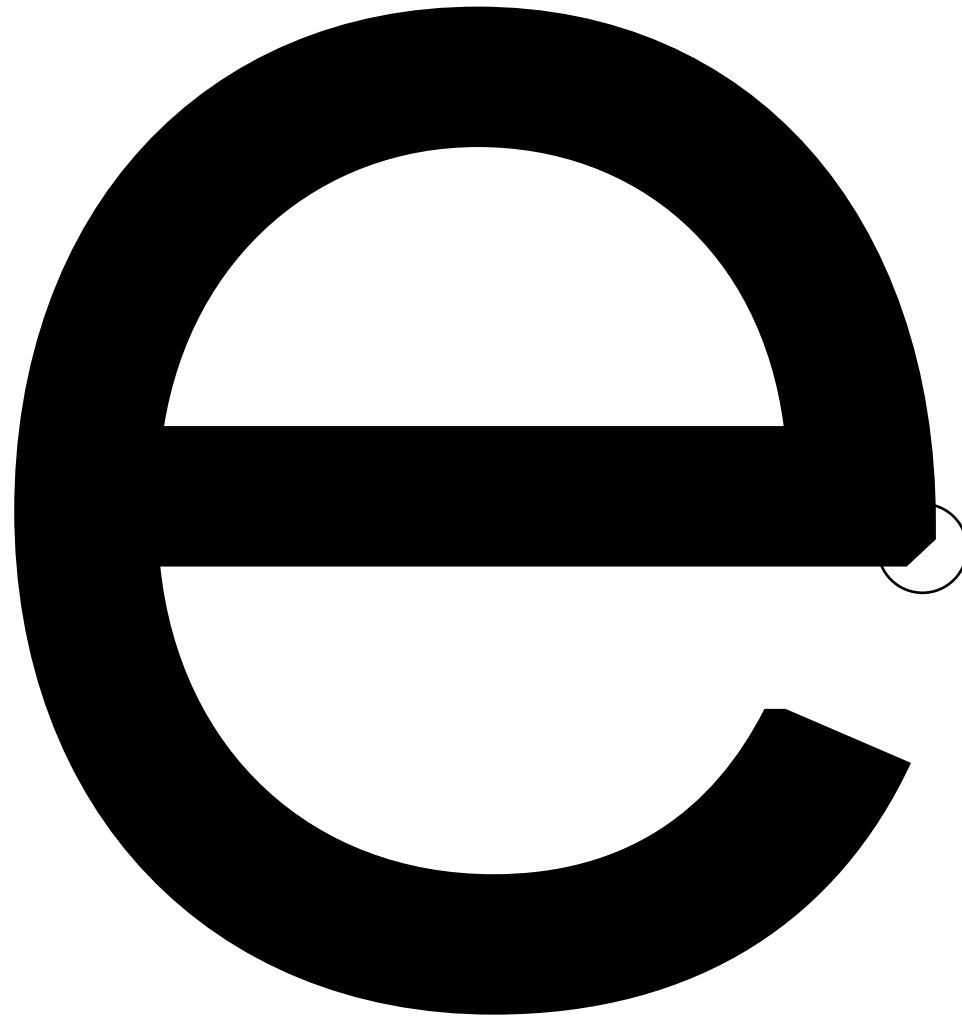

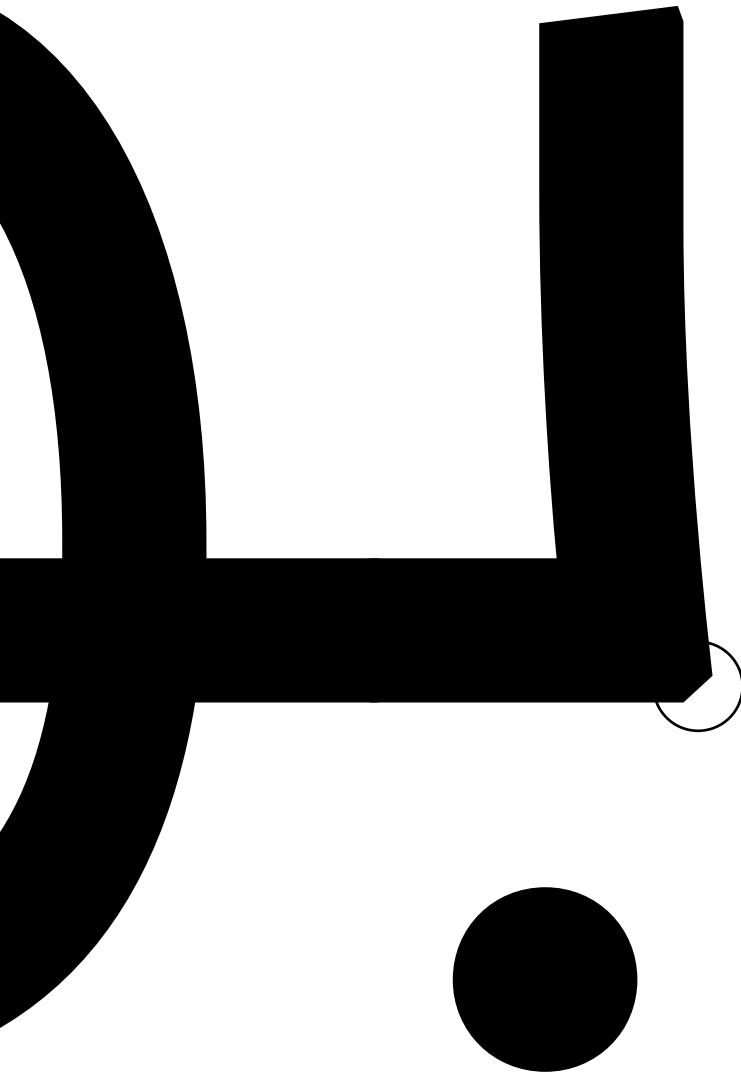

Chopped vertexes

Slightly angled

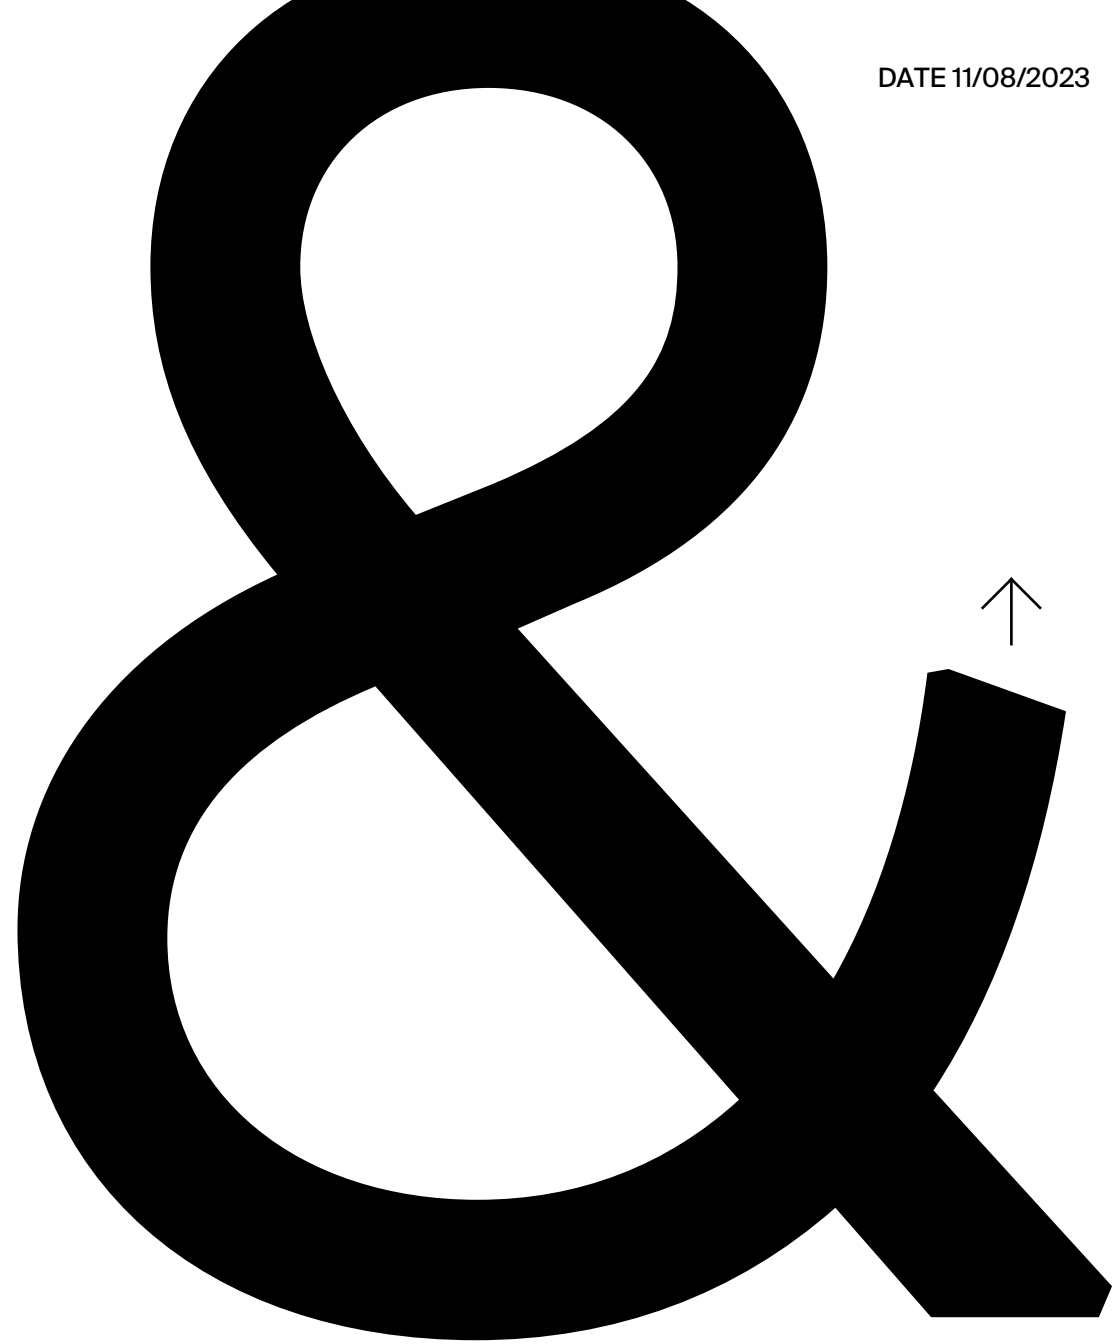

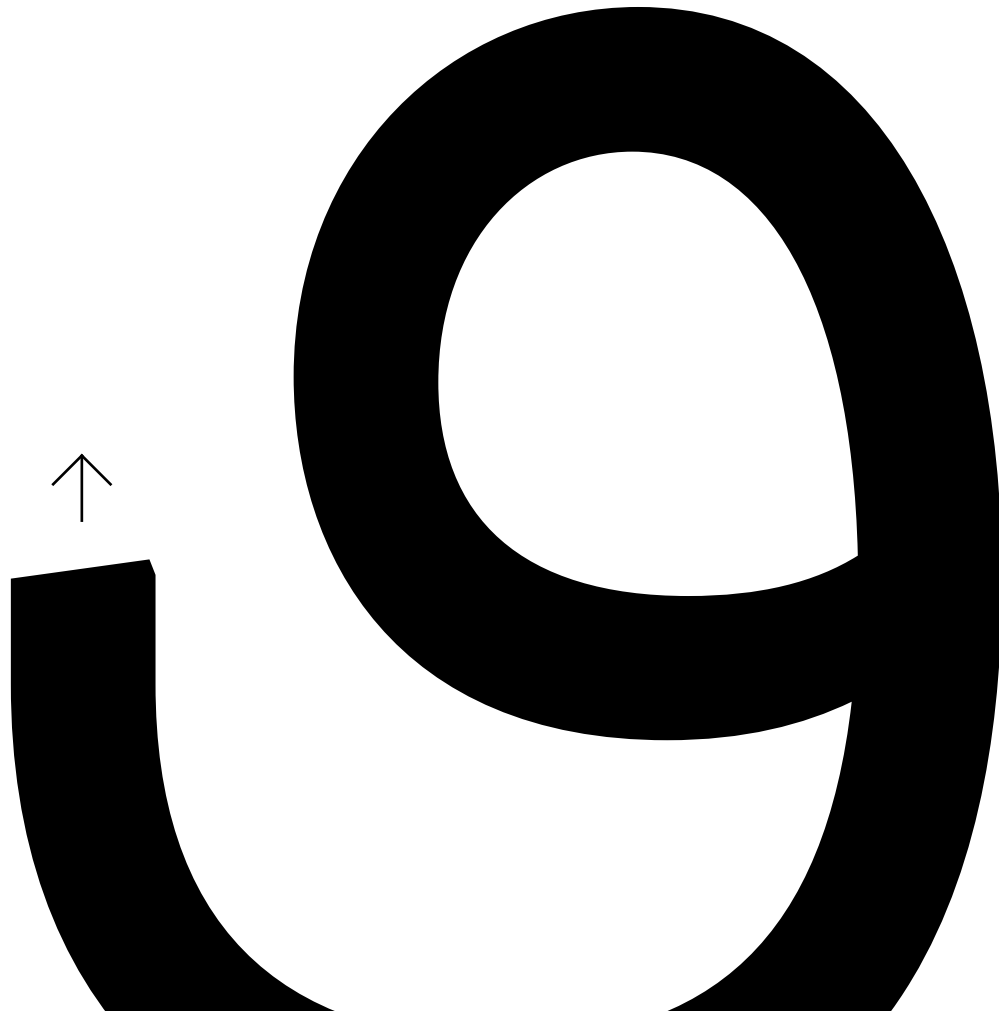

Straight.
No inktraps or
angled stems

The features designed in Arabic are
extrapolated to the Latin forms keeping the
same proportions.

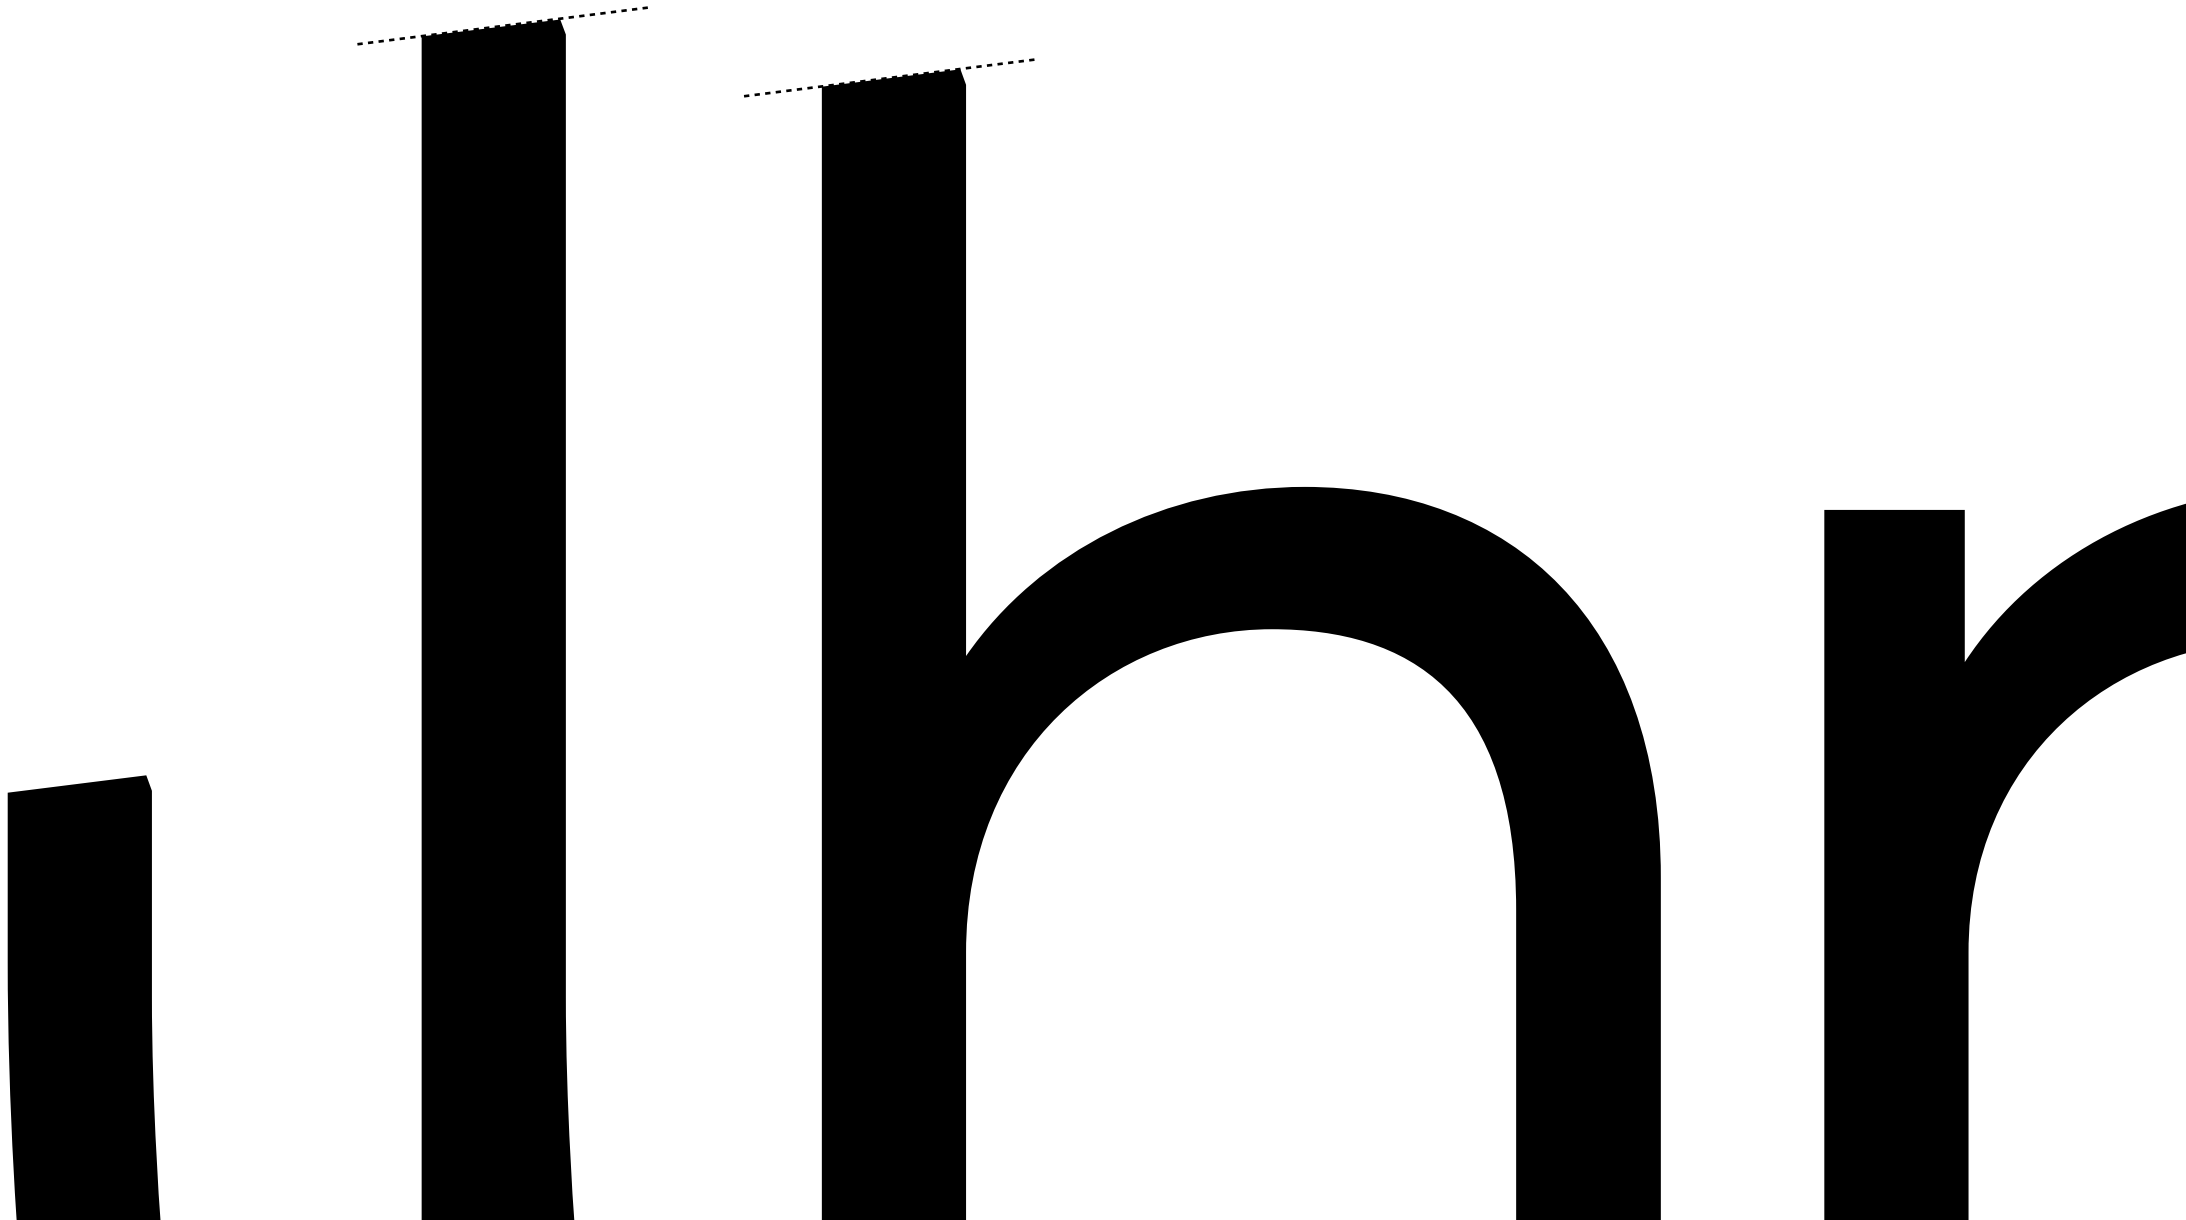

Blunt corner

Same nature in the ends
of the curly strokes.

Same angled terminals in long ascenders
and straight short vertical stems to favor
neutrality.

Straight projections to contribute the
verticality in the texture of the text.
