be reported again.

Generation and Mapping of Chromosome Specific Sequence tagged Sites.

The chromosomal DNA was purified and digested to completion with BamH and Hind. The digested DNA 50 ng was ligated to a two fold excess of BamHI and HindIII digested and alkaline phosphatase treated M13mp18 replicative form DNA^①. Transformation of Escherichia coli strain DH5F BRL yielded approximately 10³ recombinants per nanogram of DNA. The average insert size of these clones was 2 kb and 55 of the plaques hybridized to human Cot50 DNA which is consistent with distribution of repetitive sequences in human DNA of this length^② Moyzis et al. 1989. The use of four base cutters such as Sau3A for the construction of STS libraries is not recommended because the fragments cloned are frequently too small.

^①The use of four base cutters such as Sau3A for the construction of STS libraries is not recommended because the fragments cloned are frequently too small to yield sufficient sequence for an STS unless size selection is used prior to cloning. We have found that double digestion with BamHI and HindIII produces clones approximately 2 kb in length which are appropriate for sequencing without the need for size selection.

^②DNA from various species may differ in antigenicity recently it was suggested that for human anti DNA human DNA forms the best recognized antigen ³. Yet while studying species specificity of anti DNA it was also found that human serum antibodies as well as monoclonal murine anti DNA antibodies bound DNA of all species tested though not to the same extent.

تذكر مقدمة كتاب كليلة ودمنة الذي تُرجم عنه بأن الإسكندر ذا القرنين الرومي احتاج في غزواته بلاد الشرق وكانت من ضمنها البلاد الهندية التي انتصر فيها على ملكها وإثر ذلك قرّر أن يُعيّن على بلاد الهند أحد أتباعه ليواصل بعد ذلك احتياحه للبلدان الأخرى إلا أن أهل الهند لم يرضوا بذلك الحاكم الأحببي الأمر الذي دفعهم لخلع واختيار شخص من بينهم وهو دبشليم وحملوه ملكاً عليهم. ولكنه ما لبث حتى تبدّل من ملك عادل رحيم إلى طاغية.

هذا الأمر دفع بالفيلسوف الحكيم بيدبا للذهاب إليه وتقديم النصيحة له وبعد أن استمع الملك إلى كلامه غضب الملك دبشليم وأمر بقتل بيدبا وصلبه في بادي الأمر قبل أن تُخيم عن ذلك والاكتفاء بخبسه. لاحقاً قام دبشليم الملك بإخراج بيدبا من السجن وطلب منه إعادة كلامه عليه. وقام بيدبا بذلك وكان دبشليم يستمع متأثراً ووعدته بأنه سيعمل بكلامه ثم أمر بفك قيوده وقد ولّاه الملك وزيراً عنده. هذا الأمر كان بداية وضع الكتاب حيث طلب بيدبا من الملك دبشليم أن يُدوّن الكتاب ويُحفظ.

بنحانترا أو الفصول الخمسة هو كتاب يتضمّن مجموعة من القصص والحكم والمواعظ وقد أجمع الباحثين بأنه هندي وتمت كتابته باللغة السنسكريتية وقد ألفه الحكيم بيدبا للملك دبشليم في القرن الرابع الميلادي

The Panchatantra is an ancient Indian collection of interrelated animal fables in Sanskrit verse and prose arranged within a frame story. The surviving work is dated to about. But the fables are likely much more ancient. The texts author is unknown but has been attributed to ishnu Sharma in some recensions and asubha rtpen names It is likely a Hindu text and based on older oral traditions with animal fables that are as old as we are able to imagine.

It is certainly the most frequently translated literary product of India and these stories are among the most widely known in the world. It goes by many names in many cultures. There is a version of Panchatantra in nearly every major language of India and in addition there are versions of the text in more than languages around the world. One version reached Europe in the century. To quote Edgerton before it existed in Greek Latin Spanish Italian German English Old Slavonic zech and perhaps other Slavonic languages. Its range has ex
